

Welcome to our office! We are sure that you will be provided the most appropriate and professional chiropractic care possible. Our most important goal is the constant improvement and maintenance of your health. Before we get started with today's examination procedures, which will determine how we can help you, we want you to understand what we do and why we are going to do it.

The goal of our office is to allow your body to function at its highest potential, free from interference and stress that causes dysfunction, disease, and eventually symptoms and sickness. When a person seeks chiropractic care and when a chiropractor accepts a patient for such care, it is essential that they are both working towards the same goals.

Most importantly, you must understand that chiropractic is not a substitute for medical treatment of any kind, in anyway, or for any reason. The medical approach treats symptoms and diagnoses conditions and diseases. Patients usually go to their medical doctors to get rid of whatever symptoms or conditions are bothering them. This is symptom, sickness, and disease care, and it is necessary in emergency situations. Chiropractic recognizes that you get symptoms for a reason, attempts to find the cause of the symptoms, and addresses the function of the whole body. This is true healthcare, focusing on the optimum function of the individual, and it's what we do in our office.

The purpose of chiropractic is to restore and maintain the integrity of the spine, spinal cord, and its nerve roots. Vital nerve pathways are housed within and protected by the bones of the spine called vertebrae. Misalignments of those vertebrae, which interfere with transmission of normal nerve impulses, are called SUBLUXATIONS. Subluxations are the most common cause of nerve system interferences (pinched nerves) and cause dysfunction to the tissues and organs that these nerves supply.

With appropriate chiropractic care, these subluxations can be reduced and corrected, which will restore normal nerve function. A properly functioning nervous system is the foundation to good health.

The information we get from you is important. We use your health history, x-rays, computerized muscle assessment, and palpatory examination to locate subluxations. For this reason, please fill out our history forms completely and to the best of your ability. It will save us from doing unnecessary tests and give us the most accurate information.

Please feel free to ask any questions at any time to the staff or doctors in our office and again, welcome. We look forward to a healthy relationship with you and your family.

Sincerely,

Dr. Justin & Woodbury Spine Staff ☺

TERMS OF ACCEPTANCE

When a patient seeks chiropractic care and we accept such a patient for care, it is essential for both to be working towards the same objective. Chiropractic has only one goal. It is only when the patient understands both the objective and the method that they will be able to attain it. This will prevent any confusion or disappointment.

An **adjustment** is the specific application of forces to facilitate the body's correction of vertebral subluxation. Our chiropractic method of correction is by specific adjustments to the spine.

Health is a state of optimal physical, mental, and social well being, not merely the absence of disease.

Vertebral subluxation is a misalignment of one or more of the joints of the body. This can cause pain or alteration of nerve function and interference of the transmission of nerve impulses, lessening the body's innate ability to maintain maximum health. We do not offer to diagnose or treat any disease or condition other than vertebral subluxations. However, if during the course of a chiropractic spinal evaluation, we encounter non-chiropractic or unusual findings, we will advise you. If you desire advice, diagnosis or treatment for those findings, we will recommend that you seek the services of a health care provider who specializes in that area. Regardless of what the disease is called, we do not offer to treat it. Nor do we offer advice regarding treatment prescribed by others. Our ONLY practice objective is to eliminate a major interference to the expression of the body's innate wisdom. Our only method is specific adjusting to correct vertebral subluxation.

I have read and fully understand the above statement. Any question regarding the doctor's objectives pertaining to my care in this office has been answered to my complete satisfaction. I therefore accept chiropractic care on this basis.
